Pricing is based on 10-75 users, one primary location or tenant, and a reasonable federal CUI environment.

C3PAO audit fees, penetration testing fees, software licenses, Microsoft GCC High licenses, hardware, managed SOC services, and external legal costs are NOT included.

Projects with multiple sites, complex OT environments, specialized systems, large user populations, or multiple CUI enclaves will be priced separately.

No certification outcome is guaranteed. The Level 2 independent assessment determines the certification result.

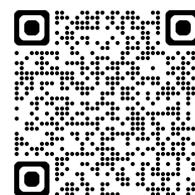

Contractors must maintain the CMMC level required in the solicitation throughout contract performance.
